

The Durrell Wanderer Trail

Find the colourful gorilla statue outside the Visitor Centre.

How many different animals are painted on the gorilla statue?

Which is your favourite?

1

Name: _____

2

Reptile House

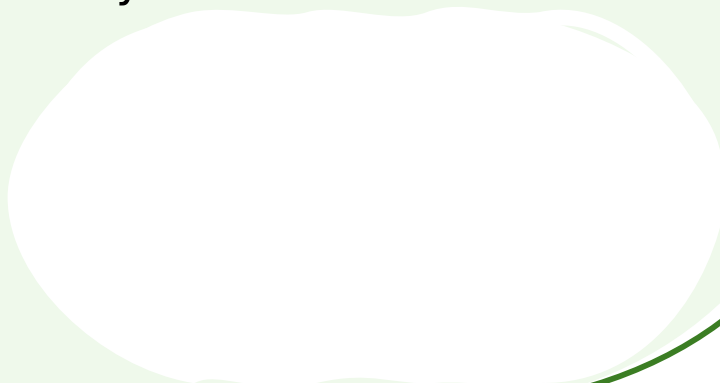

Follow the main path from the Visitor Centre, past the Durrell Discovery Centre, to the Reptile House (open from 10am).

How many different **frogs** can you find in the Reptile House?

What **patterns** can you see?

Draw your favourite in the box below.

3

Western Lowland Gorillas

Continue along the footpath, past Café Dodo, and towards the large enclosure at the end of the lawn.

Where are the gorillas today?

Inside or Outside?

What are the gorillas doing?

Count how many gorillas are doing each action and write the number in the boxes below.

Eating

Sleeping

Climbing

Walking

Sitting

4 Sumatran Orangutans

Continue on the footpath and up the slope to the playground. Turn left after the playground and head towards the wooden longhouse.

Which group of animals do orangutans belong to?

Circle the correct answer.

Fish

Birds

Reptiles

Mammals

.....

Orangutans are also apes, just like humans and gorillas.

What similarities can you spot between humans and the orangutans.

Look out for
monkeys
climbing in
the trees!

5 Tamarin Woods

Follow the path around the orangutan islands and through the indoor area. Head straight on to the 'Welcome to Tamarin Woods' information boards.

Unscramble the letters and fill in the gaps below.

Tamarins live in B _ _ _ _ _ (B Z L I R A).

They eat F _ _ _ _ _ (F U I R T) and I _ _ _ _ _ (I S N E T C S).

Therefore, they are O _ _ _ _ _ (O N I M R V E O S).

Chilean Flamingos

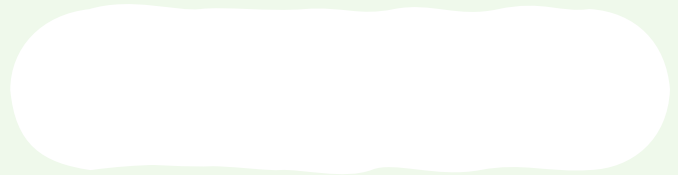

Turn right to follow the footpath between the geladas (right) and the flamingos (left).

Look down into the valley.

How many flamingos can you see?

What **colour** are their feathers?

They get this colour from the **shrimp and algae** (tiny plant-like organisms) that they eat. Without eating this diet, flamingos would be grey.

Did you know?

A group of flamingos is called a flamboyance.

Capybara

If you are lucky, you may be able to spot a capybara in the valley too. Have a look and see if you can find her.

Capybaras are **adapted** to their grassy marshland habitat.

They have webbed feet for swimming (like ducks) and brown fur to help them hide from **predators**.

If you were a capybara, where would **you** choose to hide from a predator?
